Wonder how soon folks'll be listening in on Senator Borah dodgasting a demand to the Alabama klan for a plank pledging the strict enforcement of the Fourteenth and Fifteenth amendments?

Senator Phipps exposes the fallacy of the inadequate lump-sum appropriation for the District which was fastened on the Nation's Capital by small-town minds from Punkville and Pink Mink. Not even in 60-40, but in 50-50 is the American spirit of fair play to be expressed.

Let not the wage of him who serves the State be fixed according to the rules of coolidgeconomy; the richest nation in the world to date should take its text from 16:17 Deuteronomy.

Things in Louisiana seem to oe looking black for Mr. Hoover's lily white delegates,

"HOKUS, POKUS, BLOKUS." Mr. Fox discloses how rigidly the Fourteenth and Fifteenth amendments are being enforced in Louisiana in a manner that ought to send a thrill of pride down the spine of any self-constituted Defender of the Constitution.

No wonder Texas sends Tom Blanton to Washington! We're betting that she sentences him to six years in the Senate.

Returns from the Chicago Republican primary on April 10 will probably be late in being tabulated as in some of the wards the bombing booths will remain open until 9 p. m.

Frank Link, Deneen candidate for ward committeeman, receives a bomb threat, so we may yet be looking for the missing Link.

Why can't the Democrats come to their senses and produce a little harmony by the simple "melody way" process? A child can learn it!

The State Department's idea of aiding Col Lindbergh to get out of the spotlight ir for him to make a nonstop flight around the world.

The Senate surprises itself and through without debate, and the way it leaves our most prominent windiammers full of corked up ora tory indicates that as a flood-prevention measure it's a wow.

One vaguely gathers that the bill means that the man in New York, Boston, Norfolk and places North, South, East and West will be taxed for the full cost of a smart engineer ing deal which will enable a Missis sippi Valley farmer to grab off few more acres from the river bed and build his house behind a Government-financed levee.

The farm bill for the relief of the down-trodden politicians of the country is the next economic masterpiece on the Senate calendar. The soup thickens.

Lexington, Ky., March 28 (A.P.).-Col. Charles A. Lindbergh's flight today from Washington to Lexington symbolized the final step in his effort to retire from the spotlight, it was said tonight by Col. Henry S. Breckinridge, attorney of the transatlantic flier.

The aviator left Washington at 8:50 o'clock this morning and arrived here at 2:33 this afternoon, central standard time. Washington newspaper men were under the impression that New York was his destination. Col. Lindbergh was accompanied by Col. Breckinridge, Maj Thomas Lamphier, Selfridge Field. Mich.; Capt. E. S. Land, assistant chief of the Bureau of Aeronautics of the Navy, and O. R. Root, jr., 14-year-old stepson of Col. Breckinridge.

The flier and his friends were the guests tonight at an informal reception at the home of Col. Breckinridge's brother, Dr. Scott D. Breckinridge. Col. Lindbergh will leave early tor row for an unannounced destination.

Hotel Employes Give Annual Ball

Headwaiters, busboys, chefs and potato peelers forgot all social distinctions last night and made merry at the eighth annual ball and culinary art exhibit of Local No. 781, Hotel and Restaurant Employes International Alliance at the Washington Auditorium. The Washington Hotel's culinary art exhibit of 96 pieces was awarded first prize. Following the judging of the exhibits an entertainment program was presented. Then the dancing began. The committee in charge of the affair consisted of John Reed, president of the local organization; C. G. Swiney, Jim Reed, John Connelly, Alois Schachter, C. J. Bertram and John Delaney.

Polish Arbitration Treaty Is Drafted

Acting Secretary of State OMs today handed to Jan Clechanowski. Sole Discipline of Fascists.

Sole Discipline of Fascists.

The extreme Fascist paper L'Impero comments in plain-spoken language on the Pope's now famous address to the Roman diocesan board and the National Catholic center party's rejoinder. "Let us venerate religion and incline before the pontiff," says L'Impero, "but our sole discipline is that of Italians of the Fascist era, at Mussolini's order Reading the Pope's speech seemed like a dream, as if turned ack thirty or forty years when pontiffs poured out to their faithful all the bitterness of an insupportable situation, aggravated by the permanency of the left (liberal) parties at the government of the Italian state.

"This is a case of the millionth chance coming off," said Dr. Spencer James, chief astronomer at the Cape. "It is wrong to say the star is split in two. There are two stars now, and there were two before, although we didn't know it.

"If you had a hollow globe the size of the carth and you allowed half adozen balls to fly around inside, the chances of two colliding would be about as great as the chance of a grazing impact, such as has happened Nobody expected it to occur. The two stars now wisible seem to show it was due to a collision or grazing impact. The rarity of the happening gives it streat significance. The outburst occurred three years ago. The distance between the two stars now, I judge, is a fifth of ascond of an arc. That means a separation of a fifteenth of a second annually, which is the normal average of the angular motion of stars.

"It is the first direct evidence of a collision between two stars within historical times. It is speculation to say this is the birth of a new world, but we have in this instance the same phenomenon which gave rise to life within our own. No astronomer ever entertained hopes of seeing such a rare event. We shall never be able to tell what happens, because we are too far away. The two stars may form themselves into a physical system, revolving around each other, or they may separate, each going its own way."

McNary-Haugen Farm Bill Next on Senate Program

(Associated Press.)

The McNary-Haugen farm relief bill was promised next consideration of the Senate yesterday by leaders upon disposition of the pending Agricultural Department appropriation bill.

Modified to meet many of the objections of President Coolidge, who vetoed the McNary-Haugen measure of last session, the bill nevertheless still is believed short of presidential sanction because of its resort eventually to the controversial equalization fee as a means of raising funds to market surplus crops. The bill is expected to get before the Senate late in the week or certainly by Monday. Several days are expected for consideration, but farm leaders are confident of another approval by the Senate of the argicultural measure.

Kuntz Presents Petition.

A petition was then presented by the chairman of the executive committee of the Republican committee, signed by Kuntz and others, requesting a meeting to consider the carrying out of the primaries, irrespective of the refusal of the secretary of State to print the ballots.

This meeting was held on December 29 and it was all harmony. Two days later a resolution was adopted ordering the committee to print the ballots, which appears to be in harmony with the State law. Arrangement for proper examination of the poil tax records and for the lists of registered Republicans, &c., were made with still no friction. Ballots were printed and distributed and the election took place on January 17 with harmony still prevailing. MOVING TOWARD FLOOD CONTROL.

Passage of the Jones flood control bill by the Senate gives cause for congratulation to all hose who have anxiously waited for some definite step to be taken toward an escape from the dangers that have beset the Mississippi Valev for so many generations. The Jones bill is a compromise, but a sound one. It is founded upon the plan recommended by the Army enineers who made a first-hand study of the devastation wrought by last year's floods. It provides for national assumption of the cost of such flood control measures as are necessary, obligation which the rest of the country has too long allowed the inhabitants of the flooded regions to bear. It directs an immediate study of the tributary waterways. It authorizes \$325,000,000 to carry out the work, and provides for a commission of five, including two civilians, to harmonize and supervise the task.

Perfection is not claimed for the bill that the Senate has adopted. Amendment may be found necessary as the work progresses. Additional appropriations will be needed. But the bill is a big step in the right direction, and it has been taken with commendable promptness. There is an immediate necessity that protection be given those who reside along the lower Mississippi. This can be accomplished under the Jones bill. At the same time the study of the tributary systems that make up the Mississippi should be pressed. There lies the ultimate solution of the flood problem. Engineering skill and money may be lavishly devoted to the main channel of the Mississippi, but the threat of danger will remain as long as those, in authority neglect to consider the problem from its very beginnings.

Because it meets the emergency that exists and is headed in the right direction to bring about the ultimate solution which the whole country demands, the Jones bill should be enacted into law with all dispatch possible.

GOLD GOES ABROAD.

Shipments of gold from the United States to foreign countries for March bid fair to set a new record. The total already exported, \$74,900,000, is only \$100,000 below the previous high established last December. The present movement is not balanced by imports. as has been the case previously. Only \$1,-000,000 worth of the basic metal has been recaived this month, which brings the exports aiready made this year to approximately \$100,-000,000 above the imports.

Just what eventual effect this gold movement will have can not as yet be stated. It has been suggested recently that many of the larger shipments have been made to take adantage of the profit that can be made on such ansactions when foreign exchange gets more than a point or two above par. Another factor has been the withdrawal of gold by France preparatory to the restoration of the gold standard by that country. Neither of these explanations appears to give full answer to financial trend which may assume increasing

One certainty is that the removal of so much gold makes it impossible for foreign holders to expand credit with the rapidity that would be possible if the metal remained in this country, even though earmarked for foreign account. It is also likely that the movement if continued will lead to a tightening of the money rates in the United States. but the fact that Wall street has as yet paid little attention to this phase of the situation would make it appear that the outward flow is not expected to continue at the present rate.

The present free movement, however, should tend to silence those foreign critics who insist that the United States is "hoarding the world's gold supply," and that such a course is "holding back the rehabilitation of ' This country, through its heavy inestments abroad, has already done everything that it could to further economic restoration. The recent gold movement is only additional proof of this willingness to assist wherever possible.

EXTENDED AIR EXPRESS.

The American Railway Express Co. announces plans to extend its air services to include Cincinnati, Indianapolis, Minneapolis and St. Paul. These will be the first extenston of service since the company established its air routes. At that time service was provided for between Boston, New York, Chicago, of a great system.

The expansion is bound to be beneficial in shipments in additional territory. In addition, however, and in this connection airplane express is fulfilling an invaluable function, the

speed in transportation is of importance find that they can function much more efficiently through use of it. And while the freight, mail and express carrying companies are providing such service to American business they are building up a wealth of experience in the commercial operation of planes that will furnish the foundation for a passenger-carrying

ANOTHER MUSCLE SHOALS PLAN.

The few details necessary to put the Government in the fertilizer business lock, stock and barrel, that were overlooked by Senator Norris, have been included in the Morin Muscle Shoals bill presented to the House by the military affairs committee. If a distinction may be drawn roughly between the two measures it is that the Morin bill has no other aim than to set the Government up as a monopolist in the fertilizer business, while the Norris resolution made it possible for the Government to withdraw from the business.

The Morin bill, which cloaks the necessity for untold additional appropriations under an initial provision for \$10,000,000, gets off to a splendid and characteristic start by providing that Muscle Shoals shall be operated by a commission of five men, "none of whom" shall have any financial interest in either the power or fertilizer business; a qualification that virtually insures that none of the appointees shall have any knowledge of the undertaking in which they are to engage. Having erected this safeguard, the bill continues with reckless generosity to permit the construction of anything in the way of fertilizer plants or additional equipment which these untrained men may think they need.

It is perhaps unfair to say that the Morin bill would put the Government on a competitive basis with private manufacturers of fertilizers. The measure is so drawn that there could be no competition. The fertilizer to be produced must be sold at a rate to yield 4 per cent, not on the \$160,000,000 which the United States has already put into Muscle Shoals, but merely on the amount that may be "hereafter paid in as capital stock, and then only after the first five-year period."

There is no apparent intention of making a profit during the five-year period, for during that Interval the Muscle Shoals board must donate 5 per cent of its production to farm organizations. It this fails to put the private manufacturers out of business and the board finds it has 25 per cent of its fertilizer still on its hands, it may donate an additional 10 cent. Private manufacturers are even denied the protection of their patents. The Morin measure would give the Muscle Sheals access to all "methods, formula and scientific information" which private ingenuity may have devised for the production of fertilizer to make use of as it sees fit, and the private producer may, if he thinks it worth while, file proceedings in the Court of Claims for "reasonable compensation."

Taken separately or as a whole the provisions of the Morin plan ought to make Senator Norris blush at the thought of his own moderation As the measure has been reframed nothing is left to chance. Such a bill, if it should become a law, would commit the Government to wholesale Government operation, unlimited expenditure of Federal funds, and insure the destruction of the private fertilizer industry. It is worse than the Norris resolution, and that is

SOLID BUSINESS CONDITIONS.

The political bubble of business instability, which partisan calamity howlers have sought so hard to inflate, appears to be bursting. The lamentations were momentarily so loud that the impression may have gained ground that there were dark days ahead. The most determined attack was made on the matter of unemployment, shown now to be nowhere near as widespread as the guessers would have the country believe.

If further evidence were needed of the reovery from somewhat depressed conditions of last winter and the promise of improvement for the rest of the year it may be gained from a nation-wide survey just made by the New York World. Epitomizing the responses received from leaders in 22 industries and governmental sources the World feels justified in saying that "business in the United States is on the upgrade, with unemployment on the decrease. More than that, business bids fair to escape much of the halting uncertainty that usually has characterized presidential election years.

that the greatest improvement has been noted in the building, steel and automobile industries and agriculture. American prosperity rests as much upon these four pillars as upon any other support. When an improvement is noted in these lines it can not help but spread into other branches. Pessimists have been especially prone to attack the present condition of the agricultural States, but now there is cumulative evidence that in the whole of the Middle West, from Kansas and Missouri north and from the Dakotas and Nebraska to the borders of Pennsylvania and New York, conditions are not only good, but above average. The sore spots that remain are, in fact, in regions from which complaints have been far less vociferous. The bituminous area, the oilproducing centers, the textile district of New England and a portion of the lower Mississippi Valley alone report the existence of below-average circumstances in their business

These are facts as noted by men in a posi tion to detect the trend of material affairs much more accurately than political spokesmen can do. The firm foundation of this country's prosperity should leave no room for questioning and the time appears to have come when the ancient superstition concerning a presidential year will fail to shake the confidence of the people.

The fixture at Lincoln is noteworthy because it ushers in the great spring handicaps by a special one of its own, known the world over as the Lincolnshire handicap. This race is run over the straight mile on the Carholme track. It is a genuine test both of speed and stamina. Some excellent horses have won it; others, apparently equally excellent, have unaccountably failed. The race dates back to 1853. This year there were 45 entries, and of these 26 faced the starter. The winner was an outsider, the 4-year-old, Dark Warrior which, weighted with 112 pounds, was finally quoted at 28 to 1 against, having been backed down from 40 to 1. The second and third were also 4-year-olds. The second was Philammon, carrying 105 pounds and starting at 100 to 7 against, and the third was The Mohawk carrying 111 pounds and starting at 7 to 1 against. The finish was not as exciting as it was in 1927, when Priory Park beat Orbindos by a short head, for Dark Warrior won easily by two lengths and Philammon, in turn, was three lengths in front of The Mohawk. The result and the prices show once more the glorious uncertainty of the turf.

The scene has now shifted from Lincoln to Aintree, where the eighty-first Liverpool Spring Cup engages attention today, and where the greatest steeplechase in the world, the Grand National, is set for decision tomorrow

PLANS TO REGULATE RADIO.

Although the new radio bill has not yet received the signature of the President, the Radio Commission has begun to lay plans for the re adjustment of the broadcasting system as required by the new legislation

The equitable distribution clause can be administered in one of two ways. The commission can either undertake to build up the uncongested zones to a point where they will approach equality with the congested areas, or it must start to tear down the latter. Probably it will attempt a compromise between the two courses. Already it has granted permits for the construction of sixteen new stations and increases in power to sixteen other stations in the Southern States. At the same time, however, it has advised stations in congested areas not to spend more money on apparatus for the present.

Should the commission find it necessary to tear down the structure in the existing congested zones, it is certain that the public as a whole will not take kindly to the readjustment. Various opinions and guesses have been made public as to how the new schedule will operate. New York, for instance, anticipates drastic cuts, both in the number of stations broadcasting power and preferred channels. As indicative of what may transpire, one estimate for the District of Columbia, which now has four stations, 11,150 watts power and the use of four waves, puts the line-up under the new schedule at 2.1 stations, 1.820 watts power and three-tenths of the time on a single wave. This estimate points out that an even more drastic realignment is not impossible.

It should be apparent that the new radio law is of an even more experimental nature than its predecessor. Congress, the radio industry and the public are in doubt as to how it will work out, and there is not the feeling of confidence that the radio puzzle has been solved that there was following the enactment of the original control legislation. With only minor legislative restrictions, it is pointed out, the commission during the 12-month period was able to better the broadcasting structure very little, if any. With its procedure limited by the provisions of the new bill, many believe that it will not be able to function even as efficiently as it has in the past. Yet, in justice, it should be pointed out that there exists an honest opinion that radio monopoly was in the making and that it could be stopped only through the inclusion of stringent restrictions in the bill extending the life of the commission.

It is gratifying to note that the commission is laying its plans to administer the law to its best ability. As an experiment in the control of radio, only the coming months will prove Island is trying to revive the death a tendency to raise pavements, curbs cause of their susceptibility to attacks whether or not Congress has provided a work- penalty. AMERICA'S PROSPERITY BALANCE.

One of the reasons why foreign nations are endeavoring to throw economic restrictions in the way of the United States may be found in the recent report of the Department of Commerce, which shows that the value of manufactured goods exported by this country has mounted from \$800,000,000 in 1914 to \$2,000,000,000 in 1927. During the same period the percentage of manufactured products sold abroad rose from 29 per cent to 42 per cent. Dr. Julius Klein, who is re-42 per cent. Dr. Julius Klein, who is responsible for the statistics, says that this gain raised such a whopping big campaign dents of the District requesting that vacant spaces in their particular neighbors. It can not be impressed too strongly having been urged to be a candidate. competing countries, but is due to the improved buying power of overseas markets and the quality of American salesmanship.

It must be remembered, however, that the day has only just passed when foreign countries regarded the United States as a source of raw materials only. No one abroad was hurt when England, France and Germany bought from us what they themsleves could not produce, and sent the manufactured article back to the United States. The increase in domestic production has served to make this virtually impossible and now Amercian salesmen are going abroad in increasing numbers to sell the surplus. What they succeed in selling is seen by Dr. Klein as our "prosperity balance."

This new state of affairs has much to do. no doubt, with the formation of European cartels, the demand for tariff restrictions against American products, and the hope of lowering in some degree the American tariff schedules. A gain of \$1,200,000,000 in American business abroad in less than two decades, whether accomplished at the expense of competing nations or not, is not the sort of thing to be taken lightly by European manufacturers. The United States, however, has several advantages in addition to those listed by Dr. Klein. The fields in which the gains have been made are those in which this country can hardly be rivaled, and the American market is still too attractive a plum for foreign producers for them to wish to risk a declara-

The Homemaker

By NANCY CAREY=

NCE upon a time—not long ago—we had a request for rye bread, and right side by side with it a request for cranberry conserve. Suppose we take care of these particular recipes immediately, and then try to find something a bit out of the ordinary for a supper dish. I feel that a supper is just about due us this week. Sawe had a hardy fish menu last night, and shall turn from this to the business of shopping for the week-end.

Rye Bread.

Sufficient quantity to supply us with a substantial salad for our Saturday evening meal. Tomorrow—which is Friday—of course we turn again to a fish dish, or possibly we may suggest eggs use of a sea food.

MENU

Jellied Chicken
Scalloped Potatoes of Creamed
Asparagus
Salad Supreme with Honey Dressing Rye Bread.

1 yeast cake.
1 quart of white flour.
½ quart rye flour.
½ cupful molasses.
½ tablespoonful salt.

1 quart of cranberries.

1½ cupfuls of cold water.

½ pound of seeded ratsins.

1-3 pound walnut meats.

1 orange.

1½ pounds of sugar.

Boil the cranberries with three-fourths of a cuprul of water until they burst open and then strain them and add the remainder of the water and all of the other ingderients—the raisins, orange (the whole orange seeded and chopped), and walnuts cut in pieces— and boil for just 25 minutes. Then pour the material into jelly glasses and when thoroughly cold cover with paraffin if the conserve is—to be kept for future use.

Now for a menu, and if, for instance, we have a jellied chicken dish tought and with it scalloped potatoes or creamed asparagus—as a hot dish—and then a salad supreme with honey salad dressing, we shall have had a supper rather than a more substantial meal, and likewise, if we are not too greedy we may have the jellied chicken left in (Copyright, 1928.)

The answers were wonderful which you girls sent in to the question:
If you were not yourself, which of these important women would you like to be? I was tremendously pleased, as the results showed that my girl readers are up to date, thoughtful and in deadly earnest. The standard of ideals is spiendidly high and the knowledge of what is going on is perfectly great.

Now, who won? Well, in the first place, Peaches Browning didn't get any thing higher than No. 17. As there were only seventeen names, you can see where she lands.

"My Mother" scored the highest number of votes, and if that doesn't gladden the hearts of the mothers of these girls nothing will. Who next? Guess, Helen Wills. Hurrah! The gentleman is now a district supervisor, having several hundred miles of railroad track and many bridges in his care. He was an intelligent man, though without much book education, and he was willing.

The talk turned to the building of railroad bridges across the Mississippi and Ohio Rivers—the bridges at St. Louis, Thebes, Paducah, Cairo and Memphis, and the proposed bridges at New Orleans and Vicksburg. Mr. Supervisor had worked as a sandhog on more than one of those bridges. The story he told me about sandhogs was taken from his own experience and observation.

I asked him about "bends," the very painful and frequently fatal disease to which sandhogs are subject. A sandhog.

MODISH MITZI

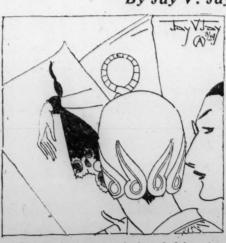

This hat is something quite new. An odd straw called Yova and remarkable because it has a brim all the way around. Somehow it begins to look as though brimmed hats were staging a come-back and it would never do for Mitzi to wake up some morning and find that brimmed hats were all the rage and not a one in her hat boxes! A nightmare thought!

Still another hat . . . and quite different. Really, if they were at all alike Mitzi might be able to choose between them. She'll have to buy this one as well as the others, because she has never seen a skull cap with such queer, little feathers plastered down in such an odd fashion. and the third consecutive day exceeded 4.000,000 shares, and substantial net losses were suffered by many of the recent leaders on the up side.

During the first two hours the market moved sedately, displaying all the signs of a well-ordered trading affair, but around midday there came a sudden change, following the advance in the call money rate to 4% per cent and then to 5 per cent. This development threw a monkey wrench into a quite general advance which had been getting under way, led by New York Central and Radio, and the market regained its old spectacular aspect.

All the recent leaders suddenly were burled under an avalanche of selling, but, to the credit of their technical position, it must be noted that they quickly assimilated all the selling or diers thrust at them and shortly many of them were on the road to recovery. It was a game of give and take thence to the close, which was unsettled and a which disclosed that losses and gains a numerically were about evenly divided, but the losses generally were broader a than the gains. Iron Trade Review says finished steel remains steady through an ebb and flow of specifications according to products, and of operations as to districts. A more spotted market situation seems in the making, but March leaves the industry about where it found it—which is saying much for its inherent strength— and majority opinion over the immediate outlook is confident.

The MOFFAT TUNNEL

VI The Moffat Tunnel was financed by the people of Denver. This unique situation places the Denver and Salt Lake as the only steam railroad in the United States to benefit by such a public improvement. This tunnel taps a coal field generally credited to have reserves sufficient to supply the entire district west of the Missouri River for a period of at least 10 years. It is calculated that there is hardly one major railroad system west of the Mississippi River that ultimately will not be directly or indirectly affected by this tunnel.

Our Railroad Statistical Department has pre-pared a study bearing on this important project. We shall be pleased to furnish additional informa-tion on request.

RAPID TRANSIT'S DEFICIT IN CUT TO \$897 IN FEBRUARY Sale

Net Income of Company Continues to Show Improvement in Earnings.

MARKET HAS DULL DAY

By F. W. PATTERSON.

An encouraging feature in the Feb-uary statement of the Washington Rapid Transit Co. filed with the Public Otilities Commission yesterday was the fact that net income continues to show

mprovement and while after depreciation and taxes there was a deficit the total in the red was but \$897.01, compared with a deficit of \$9,996.33 in the corresponding month last year.

Gross revenues were \$44,897.55, compared with \$36,163.14 in February a year ago, an increase of 24.1 per cent, while operating expenses, including depreciation and taxes, were \$45,794.56, a reduction of \$364.91 over February last year.

a reduction of \$364.91 over restant, last year.

The company also reported a gain in the number of revenue passengers carried, the total last month reaching 441,423, against 388,573 passengers in February, 1927, or a gain of 13.5 per cent.

In commenting on the operations in February, E. D. Merrill, president and general manager of the Transit Co., said, "Net revenues before depreclation for February were \$7,969.58, as compared with a dericit of \$180.08 last year, which more than justified statements recently made that the bus company's operations for 1928 would show an improvement over last year of more than \$71,000, and that net revenues before depreciation would amount buss by the same property of th nues before depreciation would amount to more than \$60,000."

Volume of Trading Less.

Yesterday's session of the Washing-

Yesterday's session of the Washington Stock Exchange was marked by a falling off in the breadth and volume of trading as well as by the fact that Washington Cas Light, which has been the market leader for several days, failed to come out. The bid was fractionally under 90, the closing price of the day before, while asked was quoted at 90.

Potomac Electric Power 6 per cent preferred advanced to 112% on an odd lot sale, while the 5½ per cent preferred moved up a quarter of a point to 108. Bids of 108 for Washington Railway & Electric preferred and of 370 for the common failed to bring out an offering.

Mergenthaler Linotype was firm and three lots sold at 103½. National Mortgage & Investment preferred advanced a fraction to 5% on a single sale of 100 shares. Lanston Monotype, starting at 103½, fell off to 106 on the following transaction, but returned to the opening price on the next and final sale. Peoples Drug Stores preferred gained a full point and changed hands at 124.

Save for a sale of \$1,000 City & Subpon at 99% there was no activity on the bond side of the market.

Railway Economies Bear Fruit.

Railway Economies Bear Fruit.

Railway Economies Bear Fruit.

The Pennsylvania Railroad report of results for February and the first two months of the current year is regarded as typical of a large number of statements now being made in that with lower groes than a year ago net railway operating income shows improvement. This development is directly attributable to economies put into effect by the carriers and now bearing fruit.

The Pennsylvania Railroad net operating income for February amounted to \$6.371.460. an increase of \$228.039 compared with the corresponding month of last year. Net income for the first two months of the year was \$13,121.127, 2 gain of \$1.844.550. February operating revenues totaled \$47.300.947, or \$4.536.-386 less than February. 1927.

Operating revenues for the two months were \$95.389.731, a decrease of \$10.169.995. Railway operating expenses in February called for \$37.181.828, while for the two months expenses were \$75.888.324, a drop of \$11.639.849.

Trusts Discussed at Meeting.

Trusts Discussed at Meeting.

With practically every Washington trust company and national bank represented by one or more officials, the initial meeting of a trust group was held yesterday. While several matters pertaining to the trust business were discussed the main matter in hand was a ceneral discussion of a concrete plan a general discussion of a concrete plan of action looking toward cooperation of these institutions with the District Life Underwriters' Association in the matter of life insurance trusts. F. P. H. ns, secretary American Security & Trust Co., presided

January Freight Traffic.

Preight traffic handled by class ilroads in January amounted to 36,-1,193,000 net ton miles, according to orts just received from the railroads reports just received from the railroads by the Bureau of Railway Economics. Compared with January, 1927, this was a decrease of 2,961,323,000 net fon miles, or 7.5 per cent. It also was a decrease of 1,404,444,000 net ton miles,

decrease of 1.404.444.000 net ton miles, or 3.7 per cent, under January, 1926. In the Eastern district, there was a decrease of 12.6 per cent in the amount of freight traffic handled in January compared with the corresponding month the year before, while the Southern district reported a decrease of 8.8 per cent. The Western district, however, reported an increase of eight-tenths of 1 per cent.

Bankers' Council Meets.

A meeting of the council of admin-tration of the District Bankers Association was held yesterday afternoon in the rooms of the association in the Becker Building.

Becker Building.

While there were several matters of importance up for discussion no statement of the proceedings was issued by W. W. Spade, president, who said that aunouncement of the main subject discussed could not be made for several days, and the other business transacted was routine.

J. and W. Seligman & Co. and the National City Bank of New York, fiscal agents, have notified holders of the Republic of Peru, Peruvian National Loan, 6 per cent external sinking fund cold bonds, of the first series, dated December 1, 1927, and due December 1, 1930, that \$250,000 principal amount of the bonds in temporary form have been drawn for redemption and will be paid June 1 at their principal amount and accrued unpaid interest to that date. The bonds are payable either in New York at the offices of J. and W. CURB MARKET REVIEW.

New York, March 28 (A.P.).—The olis and pipe lines alone showed groupstrength in an unsettled and irregular curb market today. Announcement of the amendment of Mexican government, regulations affecting American petroleum interests was accepted as invortable to the industry and a number of olis and pipe lines advanced to new high ground.

with the close of the racing season in the South, jockeys and horsemen are arriving daily for the opening of the Eastern racing season at Bowie on Tuesday next, under the auspices of the Southern Maryland Agricultural Association.

Many riders have registered at the strack within the last few days, including George Fields and Scotty Craigotile. Fields will pilot the horses of Bob Smith during the Bowte meeting, while Craignile, under contract to Willis Sharpe Kilmer, who will remain at Havre de Grace until the Harford meeting opens, will ride at Prince George's Park for Fred Hollbrook, who will make all Craignile's engagements.

Bob Smith has brought his string over from Laurel which consists of his own thoroughbreds, all of Jefferson Livingston's and part of the establishments of B. B. Jones and Admiral Cary Grayson

ments of B. B. Jones and Admiral Cary Grayson.

The first thing Fields asked on his arrival at Bob Smith's training place in Howard County, Md., was a ride on Ad-miral Grayson's \$61,000 English colt, Strolling Player, the most famous for-eign Preakness and Kentucky Derby aspirant.

Smith obliged and Fields was no sooner aboard the spirited little sorrel than he was bouncing off. Strolling Player is full of pep. He is going famously, but can hardly be said to have begun seriously the work that will fit him for his American engagements. Naturally, he is not one of the eight or ten horses Smith will race at Bowle.

The Bowie group will be Son of John. Golden Spire, Highwayman, Burning Class, Noise, Aster, Complication, Junette, Francais, Gosse de Riche, and a couple of 2-year-olds. Smith hoped to have half a dozen 2-year-olds racing at the Southern Maryland course, but all but two of his most advanced youngsters have bucked within the week.

Week.

If Smith has anything in the \$5.000 Inaugural Handicap, a dash of 7 furlongs that will be the opening day's feature, his starter will be either Son of John or Golden Spire. But neither of these can miss a work and be ready to go 7 furlongs next Tuesday and no one can say what March weather will be twelve hours ahead of a given time.

At Bowie Smith will find out whether Burning Glass, strikingly handsome son of Assegal and Dan-ing Sun, she by Waldo, belonging to Livingston, by cing Sun, she by Waldo, belonging to Livingston, is Preakness and Derby stuff. Burning Glass is a ringer for Waldo, which, at 2, handled such smart horses as Sweep, Dalmatlan, Prince Imperial. The Turk &c, without the least trouble. He believes his team has a good chance to win out in the National League.

Onslow passed out some interesting information regarding the "chain" of clubs under the Cardinals' control. Rochester, Houston, Danville, Topeka, Dayton and Laurel. The players signed by all of the clubs except the Cardinals, Rochester and Houston, are now gathering at Danville, Ill., for training, Nearly two hundred are on hand, including 50 pitchers.

planned. Owing to a mix-up by Virginia in its Owing to a mix-up by Virginia in its dates, Maryland will play at Charlottes-ville Saturday instead of Mon'tay, the latter date having been filled by riding a clash with North Carolina U., which also will be met on Tuesday.

Other games on the trip are: April 4, North Carolina State; 5 and 6, University of Georgia; 7, Georgia Tech; 9, South Carolina.

versity of Georgia; 7. Georgia Tech; 9. South Carolina.

While Coach Burton Shipley has not fully decided on whom he will take on the trip, his squad probably will include the following:

Higgins, catcher: G. Bromley, catcher and outfielder: L. Bromley, Madigan. Batson, Phipps, and DeMarco, Macd or Boublitz, pitchers; Hoffman or Yetvel, first base or left field, the one not playing the sack going into the garden: Radice, cond base: Hale, shortstop: Wilson, third base: Kessler, centerfield; Leechinsky, right field.

Only Kessler and Bromley were regulars last season, and only two others, Hale and Leschinsky, were on the 1927 squad. McGann and DeMarco are seniors but did not try for the varsity before this year, and all the others are graduates from last spring's freshman team.

Despite the Inexperience of the squad, the team should be formidable once it plays a few games. However, the Old Liners face a tough proposition in that all the teams to be met on the trip, except Virginia, will have been playing games for nearly two weeks.

sent. This will be the last meeting for enior class teams.

Among the teams which played in his section last year, most all of which ian to be back again are the 8t. Marin's, Falls Church, Crescents, Preer's, tiantics and Robins.

Problems which arose last year and he plans for the coming season were discussed and ironed out.

The teams which play in this class, in addition to the teams which play in each of the other four classes, will be eligible to the individual trophles which will be preachted to the members of the championship teams.

The Capital City League decided to resent the winners of each class with ndividual prises, instead of a cup or rophy. The officials of the league felt hat this would prove much more satisfactory to the players. The seniors are heartily is accord with this new leaf.

Long List of New Highs Is Established; Convertibles Inclined to Lag.

MOST FOREIGNS ARE FIRM

New York, March 28 (A.P.) .- Unusual tivity and firmness bordering on trength, characterized today's session strength, characterized today's session of the bond market. This was in the face of a firmer undertone in the time money market accompanying actual increase in the rate for call loans. Buying was attributed to continued investment demand, while it is not unlikely that some of the profit being made in the current "bull" market in stocks is finding its way into high grade bonds. Public utilities made the best showing as a group, although the new St. Paul Railway issues supplied the individual feature, rising rapidly to new high ground on a large volume of sales. Denver & Rio Grande Western 5s also reached a new peak for the year, but failed to consolidate their gain.

A long list of new tops was established in the utility department, which continued to derive stimulation from the broadening of the list of bonds-legal for savings bank investment in New York. For the same reason, some of the railway terminal issues maintained their recent firm trend. Bell Telephone of Pennsylvania 5s. Commercial Cable 4s, Duquesne Light 4½s Philadelphia Electric 4½s, Western Union 5s and Chicago Union Station 5s were included among the many new maximums for 1928 or longer.

Convertibles were not especially active, with the exception of Andes Copper 7s and Continental Bag & Paper 6½s, the latter selling at 92 for the first time this year. Simms and Sinclair Petroleum issues were quoted materially above their previous closing prices. the bond market. This was in the

"MELODY WAY" CLASSES CONTINUE TO INCREASE

Two Children to Broadcast **Demonstration of Piano** Progress Tonight.

ORGANIZATION IN VIRGINIA

Organization of "melody way" classes in the District and in nearby Maryland and Virginia proceeded a-pace yesterday while arrangements were being com-pleted for another "melody way" night to be broadcast 'bis evening from radio station WMAL. The melody way sys-tem of piano instruction is being spon-sored by The Washington Post, weekly lessons appearing in the Sunday editions.

lessons appearing in the Sunday editions.

Two young students of the system will demonstrate how it has developed their plano playing ability over WMAL tonight, the program being broadcast from 8:15 to 8:35 o'clock.

The children who will play are Martha P. Marston, 11 years old, of 1448 Park road northwest, and David Crandall, 7, 3419 Brown street northwest. Martha will play "Waltz Duvernoy" and "Swedish Polka," while David will play "Lady Moon" and "My Boy." Frank Kimmey, manager of the Arthur Jordan Piano Co., will be in charge of the program and will introduce the children. All questions regarding the "melody way" will be answered by experts, and in addition a general description of the course will be given.

General Motors, the sensational decline in which yesterday nearly caused a collapse of the bull market, was under steady pressure today, declining from the First Precinct and the transfer of Policeman George Helmuth from the Fourth Precinct. Martin D. McQuade, foreman of the jury, accompanied his associates into criminal court yesterday with this information. A report will be presented to Chief Justice Walter I. McCoy on or before next Monday. A copy of the report may be transmitted to the Gibson subcommittee of the House District committee from the office of Maj. Peyton Gordon, district attorney.

Mr. McQuade asked the Chief Justice if he should make the report to the court or to the subcommittee. Where upon the Chief Justice stated that the grand jury was responsible only to the court, but that out of courtesy to the legislative department of the Government a copy of the report might be presented to the district attorney, who in turn might forward it to the subcommittee.

The transfers of the members of the Police Department were the subject of an investigation conducted by the subcommittee. The fact that the grand jury is to make a report would indicate that no indictments are to be forth coming in connection with the transfers, although it is possible that the grand jury may file a report and return indictments at the same time concerning the same subject, but this is rarely done.

Inquiry Is Demanded

Rising to a point of personal privilege in the House yesterday, Representative Palmisano (Democrat), Maryland, assailed the superintendent of the Antisaloon League of that State for Calling him a "ilar." The quarrel between the two grew out of a speech made by Palmisano after Prohibition Agent J. Randolph Brewer had been acquitted of killing Charles Gundlach, a Maryland farmer.

Palmisano also criticized the Antisaloon League for distributing a pamphlet at the Capitol describing Gundlach as an "outlaw." In conclusion, he asked the House to take action on his resolution calling for an investigation of the methods employed by prohibition agents in Maryland and the District of Columbia.

Roberts Is With I. C. C.

Roberts is a valuation attorney employed by the Interstate Commerce Commission. He is both an engineer and a lawyer. He and Clayton fought the merger plan presented by the street car companies and Wilson and now under consideration by the Public Utilities Commission, when that plan was the subject of extended public hearings. Their committee had received the support of a large majority of the federation delegates in its opposition to the proposal of the traction interests. The political squabble over Roberts' election can only be understood by reference back to the federation meeting which voted its support of the committee. During the debate Col. Henry C. Newcomer, a delegate and a member of the council now seeking reelection, offered a motion that the federation go on record as "favoring in principle without going into details, the merger agreement as submitted by the companies signatory thereto."

merger agreement as submitted by the companies signatory thereto."

Newcomer's motion was overwhelmingly defeated, only the following delegates voting in favor of it: Kenneth P. Armstrong, A. C. Barker, C. B. Campbell, Hugh Frampton, M. J. Gleason, P. M. Greenlaw, E. S. Hege, E. B. Henderson, W. V. Lewis, Thomas Lodge, Newcomer, G. L. Rodier, Charles I. Stengle, Harry N. Stull, Mrs. F. M. Shortall, Frank Van Sant and Yaden.

Armstrong and Newcomer, at present members of the council, and Lodge and Stengle, all of whom voted in favor of the street car companies merger agreement, are candidates for election to the council. Hege, also a member of the council at present, was nominated for relection, but withdrew his candidacy in favor of Newcomer. Suter did not vote for the Newcomer motion, but explained his vote, saying that he favored the companies merger, but was instructed by his association not to vote for it.
